1. Introduction

- My portfolio project will be an interactive website that will display my photography work over the past few years. The website will show how I got started in photography, competitions/ awards ceremonies that I've participated in, contact information, and most importantly the art.
- This will be beneficial to me and the any organization, as I will gain experience in staging and setting up a site from the beginning. I will add forms, and selections, in which the user can interact with.

2. Expected List of Features

- List of features for the page:
  - Navigation Bar that will include portfolio, bio/about me sections, contact information, and awards/certifications
  - Forms to take in contact information/ comment section?
  - Light or dark mode for website view.
  - Play photos in section in slideshow (make this choice optional)
  - Link social media accounts.
- Brief justifications for including these features.
  - Each feature will be beneficial in showing off my photography work. It will allow me to add contact information for questions, comments, collaboration, etc.

3. Market Survey

- Do a survey of the web to find about five websites similar to yours.
  - Portfolio pages of:
    - Yasamin J Tehrani
    - Justin Eiler
    - IanRJ Creative
    - Luminita Photos

- ▪ Christina Wilken
- Briefly compare/contrast the features of these websites with your idea.
  - ○ I noticed that each of the sites contained a Homepage, contact link, and bio section. An interesting feature for IanRJ's page. Is that they provide galleries of their images, and there is also a slideshow that loops random pictures from their collection. Three of their pages also contain stores to purchase the photographer's art, and even links to book sessions.
